

Guardrail Systems

Our top fix guardrail is a lightweight system specifically designed for fixing directly to the top of the parapet wall or copings. This system is designed be installed in situations where there is an existing parapet which is too low to comply with current working at height regulations.

The system is supplied in kit form using modular components. The number of components is kept to a minimum making ordering and specification quick and simple. The top fix system is quick and easy to install and can be added to, reconfigured or adapted just as quickly.

Our range of high quality galvanised fittings mean there's no need to bend or weld saving you time and money on site.

The top fix system is fully compatible with our parapet and free standing systems and shares many of their core components.

SIMPLE

Utilises the minimum numbers of components and requires no special tools for installation.

DURABLE

Galvanised anti-corrosion coating equivalent to BS EN ISO1461 with zinc coated steel grub screws.

VERSATILE

Prefabricated components allow quick and easy erection and adaption.

The top fix system is only for use on good quality coping stones which are capable of withstanding the additional loading exerted by the system
